

THE WHITE HOUSE  
WASHINGTON

October 29, 2003

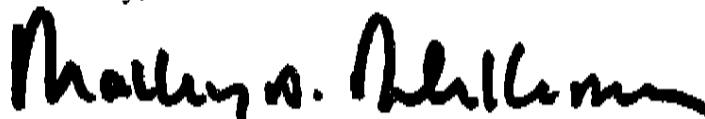

Dear Dr. Mileikowsky:

Thank you for your letter in which you request an appointment with the President to discuss your suspension by Tenet HealthSystem.

The President would appreciate an opportunity to converse with you. Regrettably, it will not be possible for us to arrange such a meeting. I know you will understand that, with the tremendous demands on his time and the large volume of similar requests, personal appointments are extremely difficult to schedule, even though each one is important.

I know that the President would want me to thank you for your request to include him in your plans and to send his very best wishes.

Sincerely,

Bradley A. Blakeman  
Deputy Assistant to the President  
and Director of Appointments and Scheduling

Dr. Gil N. Mileikowsky

Attention: Bradley A. Blakeman  
Deputy Assistant to the President  
Director of Appointments and Scheduling.

Dear Mr. Blakeman,

I am in receipt of your letter dated  
October 29, 2003.

I believe that there is a clear  
misunderstanding here.

I never believed that the President  
would be interested in discussing the  
unlawful suspension of my clinical pri-  
-vileges by TENET Health System.

Quite candidly, other than my family,  
my friends and my patients I do not  
expect ANYONE to care much about my

West Valley Medical Center

Medicament.

The purpose of my Communication is to share with the President the conclusions of my investigation, over the last 5 years, into the severe shortcomings of the quality of care in the US as a result of a significant lack of monitoring of the Healthcare Industry.

Since the Summer of 2000, I have provided sensitive information to State and Federal agencies.

As an advisor to the President, I believe that you want to share the following with the President:

1. The best and fastest way to reduce the Health Care Cost of the Country is by reducing the preventable medical/surgical complications and unnecessary, non indicated treatments/procedures.

2. As long as Hospital administrators Will be allowed to put their Dollars Signs ahead of our patients Vital Signs Health Care Costs Will Continue to Rise.
3. As long as Hospital administrators Will Continue to Control the Monitoring of the Quality of delivery of care there Will be No such thing because the lower the Quality Control, the higher the complication rate and that helps achieve Higher Profits. As, Complications generate even more Income.
4. As long as Physicians Who Stand up for higher Quality of Care are not protected by Strong Federal laws, Hospital administrators Will Continue to destroy these physicians' lives, Careers, Reputation...

As you may know, Congress passed the Health Care Quality Improvement Act [HCQIA] in 1986. It mandated a Medical Peer Review Process i.e. a Quality Control System.

It failed miserably as, I demonstrated in my analysis entitled: "The Rape of the Medical Peer Review Process by TENET Health System".

The findings of my investigation were validated and confirmed when the FBI uncovered TENET's conduct in REDDING.

It is estimated that 80 to 100,000 people die every year in the US in Hospitals from PREVENTABLE medical and surgical complications.

According to economist Kip Viscusi, from Harvard University, Americans seem to value their lives between 3 and 7 \$ million dollars.

In economic terms, these 100,000 deaths represent 300 to 700 Billion Dollars loss per year !!

The Monitoring of the Quality of Care in the Health care industry needs to be removed from the control of both physicians and administrators of Hospitals because, both groups abused and misused the Medical Peer Review process for their own agenda.

When it comes to safety, self-regulation is a dangerous myth.

The airline industry's safety is monitored closely by the FAA. Today, flying is the safest mode of transportation.

The Pharmaceutical industry's Safety is closely monitored by the FDA.

The FDA has the power to remove a drug from the US market, should it deem it is in the best interest of the public.

The Health Care industry is in the same disarray the US Intelligence Community was on 9-11. As a consequence, today the "Homeland Security Agency" incorporates and coordinates the work of about 22 previous agencies.

The United States needs such an equivalent for the Health Care Industry. I propose to name it the "Federal Health Care Quality Agency". It will incorporate valid existing State and Federal Agencies and will abolish Agencies that fail miserably to

achieve that mission.

Dennis O'Leary, M.D., President of the Joint Commission on Accreditation of Healthcare Organizations [JCAHO] for the last 15 years, stated on 11-24-02, at the 6<sup>th</sup> Annual Leadership Academy of the California Medical Association that: "There are some who believe that this whole system has to be blown up and start over again, I happen to be one of those advocates".

The JCAHO is a "Not for Profit" Organization financed by the Hospital Corporations. Its budget is 120 to 175 million Dollars per year, that's over 1.5 Billion Dollars over 10 years, at the Tax Payer's expense since, the Hospitals Tax Deduct their Contributions from their Gross Income. The JCAHO failed to assure the Safety of the Health Care industry

The Same Way the SEC failed to assure the protection of the Investors in Wall Street as, it is financed by Wall Street's brokerage firms and Investment bankers. Another major failure of "Self Regulation".

I have a "White Paper" of the "FHQIA" i.e. the Federal Health Care Quality Improvement Agency but, I can not provide it to you by FAX.

Kindly, advise me where I can send it to you safely and swiftly.

Following, please find my letter to Senator Charles Grassley - Chairman of the Senate Finance Committee investigating TENET's conduct. Unfortunately, TENET is Not alone.

Also, please find the Editorial and articles of Steve Tweed from the Pittsburgh Post Gazette regarding Physicians

Who stood up for Quality of Care and How their lives were destroyed Without EVER improving the Delivery of the Medical Care and the Causes they identified.

These physicians are true American Heroes. If you find it appropriate, after you read s. Tweed's articles, you might want to suggest to the President to invite everyone of these physicians to the White House, in order to meet with the President and work together so that the full potential of the finest physicians in the country can benefit all of our patients and reduce significantly the Health Care Budget.

Respectfully Submitted,

Sal A. Kowalsky, Jr.
